**TITLE:** SPECIAL NOTICE OF CONTRACTOR RESPONSIBILITIES FOR COMPONENTS AND TOOLING (USAAMCOM)

**TEXT**

Offerors are cautioned to carefully review all specifications in order to identify required, restricted vendor components and sources. When such restrictions apply, only components from such approved sources, manufactured to the same quality standards required by the source approval activity, may be used in manufacturing the end item. It is the responsibility of the bidder/offeror to make arrangements for obtaining required components, forgings or castings, and any necessary tooling, including but not limited to permission from the owner to use any and all tooling, dies, fixtures and facilities necessary to produce the required components, forgings or castings. Before award, offeror may be required to document provisions made for obtaining required components, forgings, castings and any other tooling.

(End of provision)
