TITLE: NOTICE: SPECIFICATION INFORMATION (USAAMCOM)

TEXT

The supplies or services described in the schedule shall be furnished in strict accordance with the specifications, drawings and requirements herein recited or referred to, all of which are incorporated herein and/or made a part hereof by reference.

For the purpose of purchasing or subcontracting as a result of this solicitation, both the offeror and the Government acknowledge that source notes on drawings, other than controlled source drawings, are for the convenience of a procuring activity. Such notes are not to be construed as restricting the source of procurement. Source information provided for the convenience of the procuring activity may include an advisory contractor part number that is not Government controlled and does not normally reflect a part equivalent to the Army Part Number (APN). Offerors must order and deliver against the APN requirements rather than contractor part numbers.

Where no Army part numbers are listed in the item description contained in the schedule and the items to be furnished are described only by manufacturer's part number or numbers, and if offeror proposes to furnish a revised or replacement part which differs in any respect from the item or items bearing the part number or numbers set forth in the schedule, offeror shall describe such differences. Offeror certifies that the item or items proposed to be furnished are interchangeable in all respects and for all purposes, with the item or items bearing the part numbers listed in the schedule.

In reviewing the drawings and specifications associated with this contract, each offeror is specifically cautioned that some of the component drawings may be identified as 'selected item drawings.' The general definition of a selected item drawing is contained in ASME Y14.100 titled Engineering Drawing Practices. It is noted that a selected item is a peculiar item in one or more characteristics and its use as specified in the technical data package is mandatory.

For selected items, i.e., those that require special screening and inspection for acceptance, it is recommended that this requirement be accomplished by the selected item manufacturer. The offeror must indicate below the point of special screening and inspection for acceptance.

Temperature cycle, stabilization bake, radiographic inspection, burn-in, electrical tests and other processing details required by the selected item drawing and related documentation are mandatory and cannot be waived, modified, changed or otherwise altered without prior approval of the Contracting Officer.

Other versions of Military High Reliability parts (e.g. JAN-TX, etc.) are not acceptable substitutes for Selected Items.

(End of Provision)
