A-3	52.233-4000 AMC-LEVEL PROTEST PROGRAM	OCT/1996
-----	---------------------------------------	----------

If you have complaints about this procurement, it is preferable that you first attempt to resolve those concerns with the responsible Contracting Officer. However, you can also protest to Headquarters, Army Materiel Command (AMC). The HQ, AMC-Level Protest Program is intended to encourage interested parties to seek resolution of their concerns within AMC as an Alternative Dispute Resolution forum, rather than filing a protest with the General Accounting Office (GAO) or other external forum. Contract award or performance is suspended during the protest to the same extent, and within the same time periods, as if filed at the GAO. The AMC Protest decision goal is to resolve protests within 20 working days from filing. To be timely, protests must be filed within the periods specified in FAR 33.103. Send protests (other than protests to the Contracting Officer) to:

-----	--	----------

(a) The first article shall be in accordance with 414C1160-2. All engineering testing, which is to be performed by the Government, shall be separate and distinct from the first article inspection and test requirement. First article inspections and tests shall include, but are not limited to, the following requirements:

"(1) A 100% inspection (or as set forth in relevant specifications) of all physical characteristics, to include but not limited to, any dimensions, certifications for materials, processes and/or procedures, as well as any other requirements which may be set forth by other applicable specifications, or in any procurement packages, technical drawings, technical data packages, and/or any other special/functional testing as set forth in this contract; and

"(2) A review for compliance to identification marking for parts, components and/or assemblies; and

"(3) A review for compliance with preservation, packaging, packing, and marking requirements; and

"(4) A review for compliance with special requirements within the specifications and drawings or as otherwise stated in this contract for the use of pre-approved parts, components, assemblies, and/or sources; and

"(5) The verification through objective evidence that all of the inspection, testing, measuring and diagnostic equipment used in the inspection/test of the first article pieces(s) are maintained in accordance with applicable calibration standards.

(b) () The Contractor shall not retain the first article provided under this contract, throughout production, to serve as the manufacturing standard of acceptance.

"() The Contractor shall retain the first article provided under this contract, throughout production, to serve as the manufacturing standard of acceptance. However, in the event it is discovered that the first article is deficient in any respect, the contract specifications shall be the manufacturing standard of acceptance. Subject to the approval of the procuring contracting officer, the first article may be shipped as the last unit on the contract, provided the Contractor reconditions the unit to meet all the terms and conditions for acceptance as set forth in this contract.

(c) Unless otherwise specified in this contract, any item destroyed or consumed during the inspection and testing process is not to be considered as part of the contract quantity. The full quantity of acceptable and serviceable items must be delivered.

(d) Unless otherwise agreed upon by the Government and the Contractor, the first article inspection and test shall be conducted at a single location, preferably at the intended site of manufacture. As part of the first article inspection and test, the Government may require the Contractor or its subcontractor to produce or demonstrate any or all of the following:

"(1) Proof that a quality/inspection program/system exists, is in place and functional at the time of the first article inspection and test.

"(2) Proof that any fixtures, tool masters, jigs, or similar devices used, in the inspection and/or testing of the first article, have been subjected to an initial inspection, or other suitable means supporting their accuracy, before being used in the manufacturing/production process.

"(3) A complete detailed description of inspection/test records shall be prepared and available at the time of the first article inspection and test. These records shall include, but are not limited to, records encompassing the manufacturing, processing, inspecting, accepting/rejecting, controlling and testing of parts, components, and/or assemblies. Examples of such records may include, but are not limited to, receiving/incoming/in-process/final inspection, process control, disposition of non-conforming material, inspection and testing done during fabrication and assembly, certification and qualification of special processes and special process personnel, written schedules and records of required periodic inspections, and the calibration and certification of all inspection, measuring, diagnostic and test equipment used.

(e) The first article inspection and test report shall consist of all the necessary documentation to demonstrate and support full compliance with the first article inspection and test requirements as set forth in this contract.

Name of Offeror or Contractor:

aircraft and/or serious injury or death to the occupants.

c. Critical Characteristic: Any feature throughout the life cycle of a FSP, such as dimension, finish, material or assembly, manufacturing or inspection process, installation, operation, field maintenance, or depot overhaul requirement which if nonconforming, missing or degraded could cause the failure or malfunction of the FSP.

d. Approved Source: A manufacturer or vendor who has satisfied, prior to contract award, all AMCOM source approval requirements as set forth in the CASL to include, if applicable, engineering testing requirements (fatigue, endurance, and/or interchangeability).

5.0 POLICY: AMCOM will only procure Flight Safety Parts from approved sources. So as to maintain the integrity and quality of these critical spare parts, manufacturers of FSPs, components, sub-assemblies, and assemblies are required to adhere to the requirements of this document in its entirety. If a contractor has difficulty in maintaining process control as evident through such things as internal management audits, customer audits, the receipt of quality deficiency reports for parts previously supplied to AMCOM et. al., this will require immediate corrective action for the current contract and could affect the award of future contracts to that contractor.

6.0 REQUIREMENTS: All requirements of this document (paras. 6.1 - 6.7) shall be complied with by a contractor receiving a contract to produce FSPs. If a process or processes that involve a CC is subcontracted, this document must be imposed, in its entirety, on the subcontractor performing the work.

6.1 MANUFACTURING PLANNING:

6.1.1 PLAN CONTENT: All manufacturing, assembly, and inspection points shall be controlled by detailed procedures outlining each step or parameter of the process along with any materials, tooling, equipment, environmental control, and operator certification required that leads to the specific production of an end item. Plans shall clearly identify all CCs and will include identification, in accordance with contractor procedures, as to its particular revision. All process plans shall clearly define sequence of operation, machine type, and accept/reject limits for the specific process or operation. Critical processes not easily verified by subsequent inspection shall clearly define process operating parameters with tolerances.

6.1.2 FROZEN PLANNING REQUIREMENTS: The contractor is responsible for developing manufacturing planning. Review and control of these plans will be the responsibility of the Contractor's Control Board (CCB) consisting of qualified personnel equipped with adequate resources to assure development of complete, reliable, and traceable documentation. Parts manufactured utilizing these plans shall meet all contractual requirements. Plans developed for FSPs shall be frozen when:

a. In the case of FSPs not requiring engineering testing, under the first production contract for the FSP at such time a successful First Article Test is completed, or at the start of production if FAT is not required.

b. In the case of FSPs requiring engineering test, at the time articles are manufactured which successfully meet the engineering test requirements.

Once frozen, plans shall remain frozen throughout the existing contract and all subsequent contracts for the item unless changes to the planning are made in accordance with this standard.

6.1.3 CHANGES TO FROZEN PLANNING: The portion of the frozen manufacturing plan pertaining to a CC shall not be changed without prior CCB recommendation, justification to AMCOM, and receipt of approval by the Procurement Contracting Officer (PCO). Changes not affecting critical characteristics or occurring as the result of an AMCOM approved Engineering Change Proposal (ECP), require CCB approval only. All changes to frozen planning affecting CCs will be submitted to AMCOM. When the item, CC, or process is produced by a subcontractor, the planning shall be reviewed and approved by the contractor, and be subject to the same restrictions as above.

6.2 AUDITS: Contractors are to perform self-audits of their frozen planning when that planning applies to CCs produced or verified in house. At a minimum, audits will be performed at the start of each production contract, annually, and when process changes occur. It is incumbent upon the prime contractor to assure that subcontractors accomplish self-audits, and the prime shall maintain records verifying that their vendors are in full compliance with the audit requirement. All audit findings will be recorded and corrective action will be documented.

6.3 CRITICAL CHARACTERISTICS:

6.3.1 INSPECTION OF CRITICAL CHARACTERISTICS: All CCs which can be nondestructively inspected/tested shall be subjected to 100 percent inspection by the contractor or subcontractor. Critical characteristics which require destructive testing are to be tested on a lot or batch basis, with no skip lots allowed. All inspection records shall identify the FSP part number, serial or lot number, and characteristic inspected. Critical characteristics shall be identified on the inspection records in such a manner as to draw attention to them. Inspection records shall reflect the exact readings or dimensions, date of inspection, identity of inspector, and any required inspection certification. These requirements are in addition to other contractual requirements.

6.3.2 VARIABILITY REDUCTION METHODS: Once the program demonstrates that the critical processes are statistically in control, stable, and capable, the contractor may submit to the PCO for approval its documentation with a request to implement a Statistical Process

Name of Offeror or Contractor:

Control (SPC) program in lieu of 100 percent inspection. This approval authority may be delegated to the Defense Contract Management Agency (DCMA) by the PCO in which case AMCOM will be informed of any approval or suspension of SPC. At the Government's discretion, 100 percent inspection may be reinstated if the process controls prove inadequate.

6.3.3 NONCONFORMING CRITICAL CHARACTERISTICS: Nonconformances of CCs shall not be dispositioned "use as is" or "repair" through contractor action, rework to print is acceptable. Waivers or deviations may be requested as specified in the contract. Request for waivers or deviations of CCs shall be classified as critical and will be forwarded to AMCOM for approval/disapproval.

6.3.4 CONTRADICTORY CRITICAL CHARACTERISTICS: Contradictions between the AMCOM FSP Spares Technical Data Package (STDP) list of critical characteristics and the drawing/specifications shall not be resolved by the order of precedence paragraph in the STDP. The contractor shall notify the PCO immediately and any work pertaining to the critical characteristic in question shall be stopped until a written resolution to the contradiction is issued to the contractor from the PCO.

6.3.5 DELIVERED NONCONFORMANCES: Contractors shall notify the PCO immediately of any discovered nonconformances that may exist in previously delivered FSPs. Notification is required whether or not the characteristic in question has been classified as a critical characteristic. Notification shall include a description of the suspected nonconformance, contract number, part number, and affected serial numbers or lot numbers, when applicable.

6.4 RECORDS:

6.4.1 TRACEABILITY OF RECORDS: All records relating to FSPs shall be traceable to the date and place of production. Records shall provide the degree of traceability required to enable subsequent verification of all aspects of material, manufacture, special process, personnel certification, variability control charts (if applicable), assembly, and inspection of CCs. Special processes include but are not limited to heat treat, shotpeening, and nondestructive testing.

6.4.2 PURCHASING RECORDS: All purchase orders for subcontracted products or processes that contain CCs must clearly identify the CC and reference this document for compliance. All documents and referenced data for FSPs shall be available for review by the Government to determine compliance.

6.4.3 RETENTION OF RECORDS: The contractor shall retain copies of all records generated pursuant to this standard and make these records available to the Government upon request. Records shall be retained for a period of at least five years after the contractor ceases to manufacture the part for which this standard applies. At the end of this period, or in the event of relocation or shutdown, all records shall be offered to the PCO prior to disposal.

6.5 CERTIFICATION OF PERSONNEL: Contractor personnel performing work or having inspection responsibilities pertaining to CCs, shall be certified to the appropriate professional level as outlined in the applicable national standards, best commercial practices, or as contractually required. A system for tracking personnel certification shall be an element in the contractor internal audit program to assure all certifications are maintained in a current status.

6.6 TOLERANCE OF MEASURING & TEST EQUIPMENT (M&TE): M&TE used to inspect FSPs must be discriminate to within ten percent of the total tolerance spread for the feature being inspected except as follows: for total tolerance spreads of less than .001, M&TE must be discriminate to twenty percent of the spread.

6.7 SERIALIZATION: All FSPs require individual serialization or identification by lot number for traceability. The contractor shall request either approval of or assignment of a block of serial numbers (S/Ns) by AMCOM. Serialization shall occur so that any individualized inspection/process that involves a critical characteristic is traceable to a specific S/N. All S/Ns approved for issue or provided by AMCOM shall be accounted for; this includes material scrapped during manufacturing. Serial numbers used in this program shall not be used on any other part manufactured by that contractor. Reporting of the S/Ns to the PCO shall be in accordance with contractual requirements.

E-6	52.246-4009	FLIGHT SAFETY PART SUPPLIER INTERFACE AND OVERSIGHT PROGRAM REQUIREMENTS (USAAMCOM)	OCT/2002
-----	-------------	---	----------

This contract is for a Flight Safety part (FSP) and requires special controls as identified in Quality Engineering Standard (QE-STD-1). In addition to the QE-STD-1 requirements, the contractor shall comply with the following:

a. The Contractor shall prepare manufacturing planning documentation in accordance with paragraph 6.1 of QE-STD-1 and DI-MISC-80508A. Any Contractor recommended changes to the manufacturing planning documentation which affect critical characteristics shall be approved by the Government. The Contractor shall not implement any process changes which affect critical characteristics without prior Government approval.

b. Written notification shall be given to the Procurement Contracting Officer (PCO) as soon as possible but at least 30 days prior to first delivery indicating the time frame when the parts being procured under this contract will be actively in production in order that a Supplier Interface and Oversight Program (SIOP) on-site review can be scheduled if such a review is determined by the Government to be necessary. The Contractor will cooperate with and allow the Government to conduct a SIOP on-site review (1-3 days typically) while the parts are actively in production. This review may also require site visits to critical process subcontractors. The purpose of the SIOP on-site review is to thoroughly review manufacturing processes and documentation for FSP and provide feed-back and direction regarding the FSP program.

NOTE: Some of the personnel that support the SIOP program (e.g. evaluate manufacturing planning and participate in the SIOP on-site reviews) are employees of the U.S. Army Aviation and Missile Command (AMCOM) programmatic and technical services support contractors employed under the Omnibus 2000 contract. AMCOM's Directorate for Aviation Engineering (AMRDEC) will, within thirty days of contract award, identify the programmatic and technical services support contractors who may be involved with this contract and may require access to your company's proprietary data (e.g., frozen manufacturing planning) and facilities in performing their duties. Since these contractor personnel are not Federal employees, they will be allowed access only if a Non-Disclosure Agreement (NDA) between their employer and your company has been established. A standard NDA will accompany the AMRDEC notification. If a NDA with the identified support contractor has not been entered into by your company, sign and submit the NDA with the frozen manufacturing planning to the PCO within thirty days of contract award. If there are objections to the NDA or the terms or conditions thereof, contact, in writing, the PCO within 10 days of receipt of the AMRDEC notification so as to allow sufficient time for a mutually acceptable arrangement be reached.

(a) The Government's REQUIRED delivery schedule is set forth under each contract line item in the schedule.

(b) The Government will evaluate equally, as regards time of delivery, offers that propose delivery of each quantity within the applicable delivery period specified under each contract line item. The Government reserves the right to award under either the REQUIRED delivery schedule or the proposed delivery schedule when an offeror proposes an earlier delivery schedule than called for under each contract line item. (c) Attention is directed to the Contract Award provision of the solicitation that provides that a written award or acceptance of offer mailed, or otherwise furnished to the successful offeror, results in a binding contract. The Government will mail or otherwise furnish to the offeror an award or notice of award not later than the day award is dated. Therefore, the offeror should compute the time available for performance beginning with the actual date of award, rather than the date written notice of award is received from the Contracting Officer through the ordinary mails. However, the Government will evaluate an offer that proposes delivery based on the Contractor's date of receipt of the contract or notice of award by adding (1) five calendar days for delivery of the award through the ordinary mails, or (2) one working day if the solicitation states that the contract or notice of award will be transmitted electronically. F-9	52.247-33	F.O.B. ORIGIN, WITH DIFFERENTIALS	JUN/1988
-----	-----------	-----------------------------------	----------

(a) The term "f.o.b. origin, with differentials," as used in this clause, means--

(1) Free of expense to the Government delivered--

(i) On board the indicated type of conveyance of the carrier (or of the Government, if specified) at a designated point in the city, county, and State from which the shipments will be made and from which line-haul transportation service (as distinguished from switching, local drayage, or other terminal service) will begin;

Name of Offeror or Contractor:

(ii) To, and placed on, the carrier's wharf (at shipside, within reach of the ship's loading tackle, when the shipping point is within a port area having water transportation service) or the carrier's freight station;

(iii) To a U.S. Postal Service facility; or

(iv) If stated in the solicitation, to any Government-designated point located within the same city or commercial zone as the f.o.b. origin point specified in the contract (commercial zones are prescribed by the Interstate Commerce Commission at 49 CFR 1048); and

(2) Differentials for mode of transportation, type of vehicle, or place of delivery as indicated in Contractor's offer may be added to the contract price.

(b) The Contractor shall--

(1)(i) Pack and mark the shipment to comply with contract specification; or

(ii) In the absence of specifications, prepare the shipment in conformance with carrier requirements to protect the goods and to ensure assessment of the lowest applicable transportation charge;

(2)(i) Order specified carrier equipment when requested by the Government; or

(ii) If not specified, order appropriate carrier equipment not in excess of capacity to accommodate shipment;

(3) Deliver the shipment in good order and condition to the carrier, and load, stow, trim, block and/or brace carload or truckload shipment (when loaded by the Contractor) on or in the carrier's conveyance as required by carrier rules and regulations;

(4) Be responsible for any loss of and/or damage to the goods--

(i) Occurring before delivery to the carrier;

(ii) Resulting from improper packing and marking; or

(iii) Resulting from improper loading, stowing, trimming, blocking, and/or bracing of the shipment, if loaded by the Contractor on or in the carrier's conveyance;

(5) Complete the Government bill of lading supplied by the ordering agency or, when a Government bill of lading is not supplied, prepare a commercial bill of lading or other transportation receipt. The bill of lading shall show--

(i) A description of the shipment in terms of the governing freight classification or tariff (or Government rate tender) under which lowest freight rates are applicable;

(ii) The seals affixed to the conveyance with their serial numbers or other identification;

(iii) Lengths and capacities of cars or trucks ordered and furnished;

(iv) Other pertinent information required to effect prompt delivery to the consignee, including name, delivery address, postal address and ZIP code of consignee, routing, etc;

(v) Special instructions or annotations requested by the ordering agency for commercial bills of lading; e.g., (A) "to be converted to a Government bill of lading," or (B) "this shipment is the property of, and the freight charges paid to the carrier(s) will be reimbursed by, the Government"; and

(vi) The signature of the carrier's agent and the date the shipment is received by carrier; and

(6) Distribute the copies of the bill of lading, or other transportation receipts, as directed by the ordering agency.

(c) (1) It may be advantageous to the offeror to submit f.o.b. origin prices that include only the lowest cost to the Contractor for loading of shipment at the Contractor's plant or most favorable shipping point. The cost beyond that plant or point of bringing the supplies to the place of delivery and the cost of loading, blocking, and bracing on the type vehicle specified by the Government at the time of shipment may exceed the offeror's lowest cost when the offeror ships for the offeror's account. Accordingly, the offeror may indicate differentials that may be added to the offered price. These differentials shall be expressed as a rate in cents for each 100 pounds (CWT) of the supplies for one or more of the options under this clause that the Government may specify at the time of shipment.

(2) These differential(s) will be considered in the evaluation of offers to determine the lowest overall cost to the Government. If, at the time of shipment, the Government specifies (normally on a Government bill of lading) a mode of transportation, type of vehicle, or place of delivery for which the offeror has set forth a differential, the Contractor shall include the total of such

(3) The Government shall have the option of performing or arranging at its own expense any transportation from Contractor's shipping plant or point to carrier's facility at the time of shipment and, whenever this option is exercised, the Government shall make no reimbursement based on a quoted differential.

(4) Offeror's differentials in cents for each 100 pounds for optional mode of transportation, types of vehicle, transportation within a mode, or place of delivery, specified by the Government at the time of shipment and not included in the f.o.b. origin price indicated in the Schedule by the offeror, are as follows:

(a) Format: Contractor initiated Engineering Change Proposals (ECPs), Value Engineering Change Proposals (VECPs), Request for Deviations (RFDs), and Request for Waivers (RFWs), collectively referred to as "proposals", shall be prepared in accordance with the format and requirements specified in the following paragraphs:

(1) Class I ECPs require the "Long Form Procedure" for documenting the change and describing the effects of the change on the suitability and supportability of the Configuration Item (CI). Class I ECPs should be limited to those that are necessary or offer significant benefit to the Government. Class I ECPs are those that affect the performance, reliability, maintainability, survivability, weight, balance, moment of inertia, interface characteristics, electromagnetic characteristics, or other technical requirements in the specifications and drawings. Class I ECPs also include those changes that affect Government Furnished Equipment, safety, compatibility, retrofit, operation and maintenance manuals, interchangeability, substitutability, replaceability, source control specifications and drawings, costs, guarantees or warranties, deliveries, or schedules. Class II ECPs are those that do not affect form, fit and function, cost, or schedule of the system CI and do not meet the other criteria described above for Class I ECPs.

(2) Long Form Procedure: Class I changes to the CI require that AMSAM-RD Form 523, pages 1 through 7 (as applicable), be prepared. Use of this procedure assures that all effects of the change on the CI are properly addressed and documented to the necessary detail to allow proper evaluation of the proposed change.

(3) Short Form Procedure: ECPs and VECPs, which meet the requirements of Class II ECPs, shall be prepared using AMSAM-RD Form 523 (page 1 only). Supplemental pages may be used with the form as necessary. The responsible Contract Management Office (CMO) will enter the appropriate data in Block 5 "Class of ECP", Block 6 "Justification Codes", and Block 7 "Priority."

(4) The Contractor shall not manufacture items for acceptance by the Government that incorporate a known departure from requirements, unless the Government has approved a RFD. RFDs shall be prepared using AMSAM-RD Form 527 or AMSRD-AMR Form 530 (Type I).

(5) The Contractor shall not submit items for acceptance that include a known departure from the requirements, unless the Government has approved a RFW (AMSAM-RD Form 527) or Type II RFD (AMSRD-AMR Form 530).

(6) Each ECP, RFD or RFW submitted shall be accompanied by a written and signed evaluation prepared by the responsible Defense Contract Management Agency (DCMA) technical representative. The DCMA written evaluation shall be considered part of the ECP/RFD/RFW proposal submitted.

(7) Classification of RFDs/RFWs.

(a) Major RFDs/RFWs. RFDs/RFWs written against CIs shall be designated as major when the RFD/RFW consists of acceptance of an item having a nonconformance with contract or configuration documentation involving health; performance; interchangeability; reliability; survivability; maintainability; effective use or operation; weight; appearance (when a factor); or when there is a departure from a requirement classified as major in the contractual documentation.

(b) Critical RFDs/RFWs. RFDs/RFWs written against CIs shall be designated as critical when the RFD/RFW consists of acceptance of an item having a nonconformance with contract or configuration documentation involving safety or when there is a departure from a requirement classified as critical in the contractual documentation.

(c) Minor RFDs/RFWs. RFDs/RFWs written against CIs shall be designated as minor when the RFD/RFW consists of acceptance of an item having a nonconformance with contract or configuration documentation which does not involve any of the factors listed above in paragraphs 7(a) or 7(b), or when there is a departure from a requirement classified as minor in the contractual documentation.

(8) Proposals shall include sufficient technical data to describe all changes from existing contract requirements.

(9) Proposals shall include sufficient justification for making the change, including a statement of contract impact, if the change is not authorized.

(10) Proposals for ECPs shall set forth a "not to exceed" price and delivery adjustment acceptable to the Contractor if the Government subsequently approves the proposal. If approved, the equitable increase shall not exceed this amount.

(11) Times allowed for technical decisions for ECP and RFD/RFW proposals will be worked out via mutual agreement between the

(12) The Contractor shall submit, concurrent with the ECP, a separate AMSAM-RD Form 525, "Specification Change Notice" (SCN), for each specification that would require revision if the ECP were approved.

(13) Proposals for VECPs shall set forth a "not less than" price and delivery adjustment acceptable to the Contractor if the Government subsequently approves the proposal. If approved, the savings shall not be less than this amount. Proposals that involve aggregate increases or decreases in cost plus applicable profits in excess of \$550,000 will require the submission to the Contracting Officer of an executed Certificate of Current Cost or Pricing Data in accordance with FAR 15.406-2.

(14) The Contractor shall utilize AMSAM-RD Form 526, "Engineering Release Record" (ERR) to release new or revised configuration documentation to the Government for approval.

(15) The Contractor shall utilize AMSAM-RD Form 524, "Notice of Revision" (NOR) to describe the exact change(s) to configuration documentation specified as a data requirement in the contract. The Contractor shall describe the change using sub-sections entitled "WAS" to describe the current contractual technical requirement and "IS" to describe the proposed new requirement.

(b) Submittal: The Contractor shall submit two (2) copies of each proposal to the responsible ACO. One (1) copy of each proposal shall be returned to the Contractor within (5) working days after receipt by the Administrative Contracting Officer (ACO), stating whether or not the proposal is in compliance with this provision. Any unresolved differences between the ACO and the Contractor concerning ECPs, VECPs, RFWs or RFDs will be submitted to the Contracting Officer for resolution. Submittals may be made by electronic means by scanning the appropriate completed forms into a computer or preparing the forms electronically.

(c) Distribution:

(1) Electronic Distribution

The preferred method of distribution is via submission through the Internet E-mail System to the Government Contracting Officer. Microsoft Word is required for use with the transmittal letter (E-mail). Required forms will be attached to the E-mail. All forms may be obtained from the AMCOM Acquisition Center Website (<https://wwwproc.redstone.army.mil/acquisition>) by clicking on "Forms/Checksheets." The forms are in both "Adobe Acrobat" and "Form Flow" formats. In order to access and use the forms, the user must have the "Adobe Acrobat" or "Form Flow" software installed on their computer. Drawings may be scanned into the computer and sent as an attachment. In some cases, because of size, drawings may have to be sent as hard copies or sent under special electronic instructions provided by the Government Contracting Officer. Contractors who do not have access to the AMCOM Acquisition Center Website will need to contact the Contracting Officer, the appropriate Project Office Configuration Management Office, or the Technical Data Management Division (AMSRD-AMR-SE-TD) to have the AMSAM forms sent to their facility.

(2) Hard Copy Distribution

For each Class I or II ECP, or each RFD/RFW that the ACO determines to be in compliance with this provision, the Contractor shall submit the original plus five copies to the Contracting Officer and one copy to the ACO. Upon receipt of any type of change proposal that is submitted to the Contracting Officer, the ACO shall immediately submit DCMA's written evaluation pertaining to the proposed engineering change action to the Contracting Officer. Assistance in preparing any of these proposals may be obtained from the ACO or AMCOM Change Control Point at:

Telephone: 256-876-1335

For each VECP that the ACO determines to be in compliance with this provision, the Contractor shall submit the original plus five copies to the Contracting Officer and one copy to the ACO. Upon receipt of any VECP that is submitted to the Contracting Officer, the ACO shall immediately submit DCMA's written evaluation to the Contracting Officer. The Contractor shall also submit one copy of the VECP to the AMCOM Value Engineering Program Manager (VEPM) whose address is below. Assistance in preparing VECPs may be obtained from the VEPM.

I-85 52.209-4001 FIRST ARTICLE APPROVAL: ALTERNATE OFFERS/BIDS/QUOTES (USAAMCOM) OCT/1992

(a) When supplies identical or similar to those called for in the solicitation have been previously furnished by the offeror/bidder/quoter and have been accepted by the Government, the requirement for First Article Approval may be waived by the Contracting Officer. However, the Contracting Officer may determine the waiver of the First Article Approval requirement is not in the best interest of the Government; therefore, all offerors/bidders/quoters must submit an offer/bid/quote based on compliance with the First Article Approval provisions of this solicitation in order to insure being considered responsive. This offer/bid/quote must appear in the "Offer "A" - First Article Approval - Contractor Testing Required/"Bid "A" - First Article Approval - Contractor Testing Required" portion of Section B for each item requiring First Article Approval.

Such test reports or other evidence shall be considered in determining whether Government approval without a First Article Approval requirement may be appropriate for the pending procurement.
